## ANNOUNCEMENT

Executive Committee of Management of Andorra Nurseries, 1922

W. Frazier Harrison, Chairman J. Howes Humphreys Adolph Steinle William J. Lawson A. G. Carver

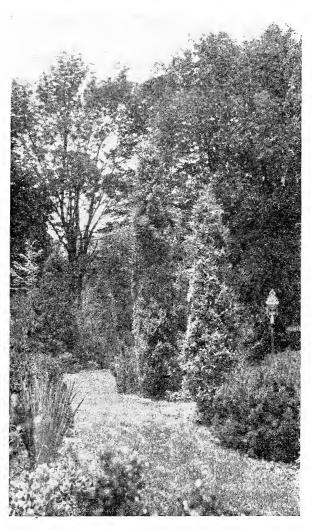

#### Sales Department

William J. Lawson Farnham B. Martin Jean H. Cojan John L. Mearns

Supplemented by Members of the Executive Committee

William Warner Harper,

Proprietor

An Evergreen Walk at the Entrance to Andorra Nurseries

Directions for Ordering

Write plainly and give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed, but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants to be shipped by express.

All orders are accepted subject to previous sale and the fol-

lowing terms and conditions:

PRICES.—Prices in this catalog cancel all previous lists, cata-The prices in this catalog cancer an previous hots, catalogs and quotations. Prices are subject to change without notice. The prices in this catalog include packing, except on special bulky pieces, for which cost of packing will be extra. Our prices are f. o. b. our shipping station, or for local delivery f. o. b. customer's place if within 10 miles of our Nurseries. Arrangements can be made for distance deliveries by motor trucks of full truck loads if desired.

STOCK SPECIALLY SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen, irre-

spective of catalog list price.

QUANTITY.-Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively. Where no price per single plant is quoted lots of less than five plants of any one sort are sold at the 10 rate, plus 50%.

PACKING.—All goods are thoroughly packed, insuring best protection while in transit. ALL PACKING CHARGES ARE INCLUDED IN OUR LIST PRICES, except for specimen stock of unusual size, when the packing will be at cost.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when accounts will be due in 30 days.

Forwarding and Shipping SHIPPING SEASON opens about March 1st in the Spring and

August 1st in the Fall.

INSPECTION AND FUMIGATION.—Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

GUARANTEE AND CLAIMS.—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Our stock is of the highest grade, thrifty and well grown, insuring its success if properly cared for after transplanting. As we have no control over its usage after it leaves our hands properly packed and in good condition, we can give no guarantee on the life of stock; however, any just complaint will receive our utmost consideration. Claims must be made within five days after receipt of goods. Stock delivered as per order and in good condition is not returnable.

GOODS IN TRANSIT.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition. Claims for damage while in transit must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill, promptly present your claim to the transportation company and send copies of all papers so we can help you to secure prompt settlement.

ADDRESS all correspondence and orders not to individuals, but to

Thro the Dreary Months of Winter Evergreens Furnish a Note of Warmth and Cheer

### An Invitation to Andorra

Those interested in trees and plants out-of-doors are always cordially welcome at Andorra. Excellent highways through this beautiful rolling section of Pennsylvania, with its charm of colonial manor house and country-place, offer inviting roads from every direction to visitors in motor cars. Train connections over the Chestnut Hill branches of both the Pennsylvania and Reading Railroads make Andorra a two-hour run out of New York and a half hour from the heart of Philadelphia; from Chestnut Hill Stations a ten-minute ride on the City Line trolley cars brings one to the Nurseries.

## Planting New Places

offers a problem both interesting and difficult to those not entirely familiar with Trees and Plants in their relation to each other and the future effect when combined in groups.

Andorra House is the title of a booklet just published, showing the development of the grounds about this home—its illustrations carry one from the construction period to the finished place, showing in a marked way how much can be done with a small property, when carefully planned and planted. A copy will be sent on request.

## Evergreen Trees

All Evergreens are lifted with ball and b	urlapped.

## Balled and Burlapped—"B & B.

HE prime essential of success in transplanting trees and shrubs is that they have a system of fine fibrous roots which are obtained at Andorra by frequent transplanting and pruning. Most deciduous trees and shrubs when they drop their leaves are in a dormant state, and do not require the same degree of care in handling as the evergreen trees which always bear their leaves, and so are always exposed to untoward conditions of drought and wind. To insure the success of our evergreens in shipping, their compact balls of fine fibrous roots are carefully lifted from the ground still surrounded by the damp protecting soil in which they grew, and securely wrapped in burlap, so that they are never exposed to the danger of drying out in shipment, and they will reach the purchaser in perfect condition.

## Evergreen Shrubs

_		
ARBUTUS SHRUB. Dwarf; glossy foliage. Flowers continuously from July till frost, arbustus-like pink. Use in masses. Strong plants in 5-in. pots Each \$1 00	Per 10 \$8 50	Per :
ANDROMEDA Catæsbæi. (See Leucothoë Catæsbæi.)		
A. floribunda (Pieris floribunda).  MOUNTAIN FETTERBUSH. Low spreading graceful shrub; dark green foliage; white flowers in early Spring		
15 to 18 in. spread Each \$4 50 18 to 24 in. spread 6 00  Specimens. 24 to 30 in 7 50	$\begin{array}{ccc} 37 & 00 \\ 50 & 00 \\ 60 & 00 \end{array}$

NATIVE RHODODENDRONS	
The following sorts are very hardy and are	
natives of the Appalachian Mountains as far North	
New Hampshire. The plants listed are grown at	
Andorra Nurseries.	
RHODODENDRON catawbiense.	
CATAWBA RHODODENDRON. Parent of	
the hardy hybrids. Late Spring blooms of	
rose-lavender. Very heavy nursery-grown	
stock. Recommended for extensive woodland	
planting.	
This is all nursery-grown stock, nearly	
as broad as its height. The very heaviest kind of material.

# Rhododendron Culture

Best known of flowering Evergreen Shrubs, the "Rose Tree"—so called by classic Grecians—stands preëminent with its wealth of gorgeous blooms in rich color against the cool green leaves. There is a popular belief that Rhododendrons can be grown only in peaty soil; on the contrary, the only factor limiting their use in temperate regions is the fact they will not thrive in soils strongly impregnated with lime, in which case it is necessary to ameliorate the condition of the soil with peat and leaf mould, otherwise most good garden soils are admirably adapted to the growth of Rhododendrons. The most important element of success with Rhododendrons is to protect them against the cutting winds of Winter by thick borders of other evergreens and deciduous shrubs, and to keep their roots moist in Summer by a heavy mulch of leaves. With these two simple needs in mind, no place need lack the beauty of the handsome Rhododendron.

Andorra Rhododendrons are grown on open hillsides, and can be depended upon to produce satisfactory results which cannot be expected of tender imported plants. The following list comprises varieties carefully selected for their hardiness and beauty of flower. Our stock comprises over 10,000 plants absolutely acclimated to our severe Winters and hot Summers; their hardiness and vigor are well proven.

# Deciduous Trees

Deciauous Trees		
ACER dasycarpum. (See Acer saccharinum.)		
A. ginnala.         TARTARIAN MAPLE. Medium height, low-branched. Brilliant autumnal coloring.         2 to 3 ft.       Each \$1 00         3 to 4 ft.       1 50         4 to 5 ft.       2 00         5 to 6 ft.       2 50         6 to 7 ft.       3 50         Specimens. #### MAGNOLIAS—CHINESE SPECIES

Small trees flowering early, the blossoms magically appearing over night. Excellent for the garden or intimate planting near the house and seen to best advantage against a dark background of evergreens. Very fragrant. Any planting devoid of Magnolia bloom in early spring loses much of the charm of our first bloom in the shrubbery or as specimens. Special attractiveness is added to garden entrances and pathways when these beautiful trees flank the entrance. Either grown in bush form with their branches down to the ground or trained to simple stems when their dense branching and heavy foliage form a rich canopy and over-arch the pathway.

## MAGNOLIA Alexandriana. (Hybrid.)

ALEXANDER'S MAGNOLIA. Hardy an	
vigorous. Large, glossy foliage; deep cu	p-
shaped pink tinted flowers in April.

JAPANESE WATER ELM. A rare tree.		

## Deciduous Trees for Screens and Windbreaks

By properly planting trees of quick-growing varieties in combination with slower growing, more permanent sorts, it is easily possible in a few years' time effectively to blot out objectionable views which may mar the outlook from house or lawn, at the same time by planting flowering trees, evergreens or shrubs on the lawn side, producing an added attractive landscape feature.

The trees, found in this category, comprise varieties which are valuable for the purpose, on account of their quick-growing qualities, as the Birches and Poplars, or for the charm of gorgeous fall coloring, as the Pin Oak. The admixture of long-lived trees and flowering sorts with this group is advisable. In any mass planting of trees the quickest and most satisfactory results are obtained when the spaces between the trees are planted with an undergrowth of spreading shrubs.

Oriental Plane Tree.

PLATANUS orientalis (acerifolia).

## ORIENTAL PLANE.

The proprietor of the Nurseries saw this tree in Europe many years ago and, realizing its great value as a street tree admirably adapted for city planting, introduced it extensively in this country. We have made a specialty of growing the Oriental Plane. spaced wide apart in the nursery rows, insuring a fine symmetrically-developed top, while frequent transplanting creates thick fibrous root-system. Our trees are immeasurably superior to those grown without the care which we exercise, and will produce the quickest results.

Per 10 Per 100

This rapid-growing, symmetrical, wide-spreading tree, together with the Norway Maple, are most suitable for city street planting. Attractive trunk and foliage. Rapid grower; fine, symmetrical head. Not bothered by insect pests or smoky, dusty locations.

# The Oak

On account of its long life and freedom from injury by storms the Oak is generally looked upon as an extremely slow growing tree. To the contrary some varieties grow quite as fast as our other hard wood trees, notably the Pin and Red Oaks. Both these varieties are admirably adapted to street, avenue and lawn planting, where a handsome permanent tree is required.

## QUERCUS alba.

WHITE OAK.         Broad, open head; in the Fall purplish-brown leaves, on spreading branches, held through Winter.           5 to 6 ft.         Each \$2 50 6 to 8 ft.           10 to 12 ft.         5 00	Per 10 \$20 00 30 00

## The Elm

Holding a distinctive place as a street tree or stately specimen the American Elm has become more widely known than some of the other varieties; these should share with the American species its popularity as they are adapted to a wide range of soils and possess the merit of being fairly rapid growers.

## ULMUS americana.

AMERICAN ELM. Vase-shaped head. Peculiarly appropriate for street or lawn planting. giving vaulted cathedral effect.

H. moseranium hybridum.  GOLD FLOWER. Large yellow flowers on low graceful stems in mid-Summer. For edge of the shrub border or garden.  1 year	6 00	30 00
ILEX. See also pages 6, 28 and 29.	0 00	
I. Sieboldii (serrata).  RED-FRUITED JAPANESE WINTER-BERRY.  Of the many interesting introductions from Japan, this beautiful shrub stands out as pre-  ëminent for its wonderful display of bright red, holly-like berries, which thickly crowd every twig. It is of slow growth and capitally suited for planting in evergreen beds or borders, where its beauty is doubly enhanced. The berries remain till late in the winter. Plant with evergreens in border.		
2 to 3 ft	$\begin{array}{ccc} 7 & 50 \\ 10 & 00 \\ 15 & 00 \end{array}$	50 00 65 00

A section of our Hardy Plant Department

# Hardy Herbaceous Perennials

HERE is a strong appeal in the gardens of old farm-house and cottage with the glowing yellow and orange Day-lilies, bright flowered Phlox and Peonies, and their show of hardy Chrysanthemums; a demonstration of the ease with which these plants are grown and the little care they require when one thinks how little time the busy country housewife can spend in gardening. The old-fashioned perennials have been enriched with many improved varieties and species, and every corner of the grounds can be kept bright throughout the whole growing season; the tall growing varieties can be effectively planted in the shrubberies, their flowers showing against the background of evergreen or shrub, and the lower sorts blending the edge of shrubbery and lawn in naturalesque borders, or the wood edge made gay with some of the Asters, Foxgloves, Ferns and many others.

Of flowering plants, two things are demanded—Varieties which will brighten our lawns and gardens, and which can be cut for house decoration—these hardy herbaceous plants reward us bounteously in both requirements. The height, color and flowering season of each variety are given in the following list. The tall growing varieties should be planted about eighteen inches apart and the lower-growing sorts about ten.

Quantities of 5 and 50 of a variety will be furnished at the 10 and 100 rates, respectively; quantities of less than five plants of one sort are sold at the ten-rate, plus 50%.

Hollyhocks—which we grow by the thousand. Our present stock shows a beautiful assortment of colors

N. B. Less than 5 plants of a variety will be sold at the 10 rate + 50%.

Hardy Chrysanthemums Bright in the Autumn Sunshine

When frost has browned the other flowers of the garden, these hardy plants burst forth in a profusion of bloom, in colors which seem to catch the most delicate tints and shades of bronzing leaf and gorgeous autumn sunset, while some foretell the purest white of coming snow, and pink of purpling shadows.

Planted in the hardy garden, border or lawn at edge of shrubbery, they will yield a wealth of bright flowers in late autumn, and

fill the house with cut flowers.

A Very Satisfactory Way to Utilize an Old Pond Bed or Bog

## JAPANESE IRIS (Iris Kæmpferi or lævigata) 50c each; \$3.50 per 10; \$25.00 per 100

Of all the Iris family none equal the Japanese. The large blooms, carried well above the foliage, are gorgeous in their coloring, which ranges from purest white to deep purples, indigo blues and mahogany red, between which there is a wonderful array of tints and mottlings. To see our collection a visit to Andorra in June is worth while; or better buy a full set.

Blue Danube No. 7. Deep indigo-blue with violet shadings.

Dinah No. 13. Purple flaked with white.

Goldbound No. 18. Pure white, six petaled.

Hanniball No. 21. Porcelain lined with rose purple and lavender.

Mahogany No. 26. Deep velvety mahogany red.

Mt. Hood No. 28. Violet-red shading deep blue toward center.

Neptune No. 30. Rosy-purple, suffused with light blue.

Oriole No. 32. Purple amaranth.

Princess Clothilde No. 36. Ash gray blushed with purple.

Pyramid No. 38. Deep violet-purple veined with white.

Shadow No. 42. Deep blue shading to indigo.

Templeton No. 45. Violet-purple marbled with white.

Victor No. 49. Porcelain veined with blue.

### FLEUR-DE-LYS OR HYBRID FLAG (Iris Germanica)

35c each; \$2.50 per 10; \$15.00 per 100

Bossnet No. 265. Tall; standard petals purplish bronze; fall petals, purple.

Cengalti No. 251. Standard petals light blue, veined with dark blue; fall petals veined and purple tinted.

Celeste No. 273. Satiny blue.

Cordelia No. 252. Standard petals pale blue; fall petals rosy pink.

Edina No. 253. Clear satin blue, marked with dark blue.

Eytheria No. 254. Tall; a very light purple tinted variety, veined with purple; very delicate.

Gazelle No. 256. Standard petals white, heavily frilled with clear blue; fall petals white, edged blue.

Hortense No. 257. Tall; light yellow, tinted with brown veins. One of the lightest varieties.

La Tristesse No. 271. Standard petals dull yellow bronze; fall petals veined with maroon, dashed with purple.

Mexicana No. 274. Dwarf. Standard petals yellow; fall petals veined with purple. Very distinct.

Penelope No. 260. Light bluish white, veined with violet; a striking and distinct variety.

Queen of May No. 261. Standard petals rosy lilac, veined with yellow. Tall. Distinct.

Rolandiana No. 275. Standard petals blue; fall petals reddishpurple.

Thorbecke No. 263. A very delicate sulphur-yellow.

Walneriana No. 277. Standard petals deep lavender-blue; fall petals clear bright blue.

## Planting Perennials

THE first thing to be considered is the proper preparation of the soil. The beds, enriched with well-rotted manure, should be dug deep, especially if there is a clay bottom, which should be broken through to give the bed proper drainage and permit deep rooting of the plants, so that they will withstand the drought of summer.

Rich in Form and Color the Peony is a Fine Cut Flower

### PÆONIA---PEONIES

Rich in an infinite variety of color, from white through tints of pink and rose, to darkest crimson, these hardy plants grace garden, bed or border with gorgeous bloom in May or June, and their fragrant flowers are most decorative when cut for the house or porch. Whether against a background of evergreens or shrub border, or in the garden, they yield a rich return in blossoms. They are best transplanted in August or September, but may be moved in very early spring, and should be planted about two feet apart in good ordinary garden soil.

We are making some changes in our extensive plantations of peonies, and can offer strong plants from some of the best varieties, in assortment, for fall planting, at exceptional values.

Our Assortment of Mixed Colors \$4.00 per 10 plants; \$35.00 per 100 plants

Medusa No. 432. Rosy lilac	75	5 00

### PHLOX PANICULATA—HYBRID PERENNIAL PHLOX

A succession of flowers of greatest beauty from early July until frost, in softest tones of pink and rose, salmon, mauve and silvery white in great panicled blooms, will brighten the hardy border of mixed varieties of Phlox. Easy of culture, and perfectly hardy, the plants can be used at the edge of shrub border or ir the garden, spaced about eighteen inches apart.

### Assortment in Mixed Colors of Our Selection \$10.00 per 100

### HARDY FERNS

### 50c each; \$3.50 per 10; \$25.00 per 100

- ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions,
- **ASPIDIUM acrostichoides** (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.
- A. Felix-mas (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.
- A. Goldianum. 2 to 4 ft. Semi-shaded positions, dry or moist soils.
- A. marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.
- ASPLENIUM Filix-formina (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.
- BOTRYCHIUM virginianum (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.
- DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.
- ONOCLEA sensibilis (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.
- O. Struthiopteris (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.
- OSMUNDA gracilis (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.
- O. Claytoniana. 2 to 5 ft. For open plantings, dry or moist soils.
- O. cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.
- WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.
- WOODWARDIA angustifolia (Chain Fern). 1 ft. Open or shaded positions, in moist soils.

# The Home Fruit Garden

To meet a demand for fruit trees in larger sizes than those ordinarily offered by the fruit nurserymen, we have grown a limited quantity of trees of the best varieties in large sizes, which will obviate the long wait for trees to come into bearing. List and prices on application.

Abbreviations.—Summer (s), Fall (f), Winter (w).

APPLES. Two-year-old trees of the following varieties. Per 10 Each \$1 50 \$12 50

Yellow Transparent (s), Wealthy (s), Fall Pippin (f), Stayman's Winesap (w), Spitzenberg (w), Gravenstein (f), Rhode Island Greening (w), Smokehouse (w), York Imperial (w).

Extra heavy grades. List and prices on application.

PLUMS. Two-year-old trees of the following varieties.

Each \$1 50 12 50

1 50

Giant Prune, Imperial Gage, Green Gage, Lombard.

QUINCES. Three-year-old trees—Champion and Orange. Each 1 50

Yellow. Golden Queen ......per 100, \$7 50

## Index

HIS catalogue is based on a careful survey of our Nurseries taken every Summer and Winter, and the stock listed herein is growing at Andorra Nurseries in the sizes and varieties shown, so that one is enabled to select his requirements in exact sizes for the special purpose at hand, with the full assurance that the plants will be freshly dug (not taken from storage cellars or jobbers' packing cases) and properly packed ready for shipment for long distances, with the assurance of success after transplanting.

For the convenience of our patrons, the catalogue is arranged in groups as shown below, the species being alphabetically listed under their botanical names, as the common names vary greatly in different parts of the country.

The following index will serve for ready reference to Trees, Shrubs and Plants, not only by the botanical names, but by the common names as well.

In addition to the items listed, we have many varieties in quantities too small to offer in a general list; if you do not find the item in this list which you require, write us about it.

# Fall Planting

No season of the year lends itself more readily to the safe transplanting of Trees, Shrubs and Plants.

Evergreens move readily from the middle of August to late fall and nothing will give more warmth and cheer thru the winter.

Deciduous Trees and Shrubs will be ready to transplant by early October, when all varieties will move safely.

Place your order early—Don't wait until planting season to decide on what is needed—Plan now and place your order.
